Acknowledgements

The Amendment, Drawings, and Substitute Specification filed by the Applicant on April 5, 2004 are acknowledged.

Specification

The substitute specification filed April 5, 2004 has not been entered because it does not conform to 37 CFR 1.125(b) and (c) because: the information under the heading "CROSS REFERENCE TO RELATED APPLICATIONS" is incorrect. This application is not a divisional of US serial number 09/554463 – it IS the actual case numbered US 09/554463. It cannot be a divisional of itself. None of the specifications mailed after the original specification, filed on April 19, 2000 have been entered, because they do not conform to 37 CFR 1.125(b) and (c) and because the information in the specifications does not correspond to the claims or drawings. For example, in the substitute specification filed on April 5, 2004, the "Brief Description of the Drawings" does not correspond to the drawings as originally filed, or any of the proposed drawing corrections. Figures and reference numbers in the specification should correspond to the figures and reference numbers in the drawings and claims.

Drawings

The drawing corrections were received on April 5, 2004. These drawings are not acceptable, and have not been entered. None of the drawing corrections filed after the original drawings, filed on April 19, 2000, have been entered. New corrected drawings are required in this application because none of the proposed drawing corrections were submitted in the proper

Art Unit: 3616

format, and they do not comply with 37 CFR 1.84. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

Replacement Drawing Sheets

Drawing changes must be made by presenting replacement figures which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments, or remarks, section of the amendment. Any replacement drawing sheet must be identified in the top margin as "Replacement Sheet" and include all of the figures appearing on the immediate prior version of the sheet, even though only one figure may be amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin.

Art Unit: 3616

Annotated Drawing Sheets

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheets must be clearly labeled as “Annotated Marked-up Drawings” and accompany the replacement sheets.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the “Notice of Allowability.” Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

Election/Restrictions

Newly submitted claims 74 – 90 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claims 74 – 77 are directed to a shoulder-belt-portion guiding device, and claims 78 – 90 are directed to an anti-submarining seat-belt assembly.

Art Unit: 3616

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 74 – 90 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 42 – 73 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The applicant has amended Claim 42 to include “a stiff third transport-system member” – the “stiff” description was not disclosed in the specification at the time the application was filed. The examiner suggests returning to using “a floor of the transport system” for clarity purposes. Appropriate correction is required.

Allowable Subject Matter

Claims 42 – 73 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, first and second paragraph, set forth in this Office action.

Art Unit: 3616

This application contains claims 74 – 90, drawn to an invention nonelected with traverse in the reply filed on October 21, 2003. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
